

Notes on the Way of Publishing Results of External Trade Statistics

Starting from the September 2003 data, the Czech Statistical Office changed the way of updating monthly results from monthly-based to quarterly-based. That means that monthly data will remain constant in the course of the quarter.

The following notes apply to all tables in this publication – „External Trade of the Czech Republic in January - February 2008“:

2007 data for January to December are updated, referring to 28 February 2008 closing date.

2008 data for January are preliminary, referring to 28 February 2008 closing date,
for February are preliminary, referring to 31 March 2008 closing date.

Casual differences on the last digit position arise for rounding off the absolute number.

Notes on tables

“0“ the value of imports (exports) is smaller than half of the unit of measure

“-“ the data did not occur in the reference period

“.” data unavailable or inapplicable

“x“ with indices, indicates the 100 multiple of the resulting value

* individual data

CIF statistical value of imports, which is free to border of the Czech Republic

FOB statistical value of exports, which is free to border of the Czech Republic
