

Preface

The population stocks in municipalities are obtained by the annual population balance, which the Czech Statistical Office processes based on the latest census results and annual statistics on births, deaths and migration. Data on births are based on statistical reports on births, data on deaths are based on the Basic Population Register and the Agenda Information System of Population Records in the case of Czech citizens and on statistical reports on deaths in the case of foreigners. Data on migration are based on administrative data from the Ministry of the Interior of the Czech Republic on population records (Information System of Population Records) and from the Foreigners Information System.

All data refer to citizens of the Czech Republic and foreigners with permanent residence in the Czech Republic, third-country nationals with temporary residence in the territory of the Czech Republic based on a long-term visa (over 90 days) or a long-term residence permit, nationals of the EU Member States, Norway, Switzerland, Iceland, Liechtenstein and their dependants with notified temporary residence in the territory of the Czech Republic, foreigners granted international protection in the Czech Republic and persons granted temporary protection with usual residence in the Czech Republic.

No territorial changes were executed in 2024.

All four Military Training Areas without inhabitants are also listed in the publication.
