

## Methodological notes

The process of town promotion had passed a long-term historical progress. For more details see the publication *Historical lexicon of municipalities of the Czech Republic 1869-2005 (Historický lexikon obcí České republiky 1869-2005)* or its electronic form on <http://www.czso.cz/csu/2004edicniplan.nsf/p/4128-04>.

Total 593 towns, i.e. municipalities with authorized municipal office, there were in the Czech Republic as of 1<sup>st</sup> January 2010.

The population as of 31<sup>st</sup> December of given year is computed as the population as of 31<sup>st</sup> December of last year plus natural increase (live births minus deaths) and net migration (immigrants minus emigrants). It is not true for years in which the population census was done. Here it refers to the stock as of 31<sup>st</sup> December 2001 that follows the Population and Housing Census (1<sup>st</sup> March 2001) results and not follows the stock as of 31<sup>st</sup> December 2000.

Besides natural increase and migration the changes in numbers of inhabitants are referable to merging or separating of municipalities or their parts. The administrative changes concerning here-published towns are stated in the next table.

All data refer to the residents of the towns irrespective of citizenship. Since 2001, the figures also include (in accordance with the Population and Housing Census 2001) foreigners with long-term stay (i.e. the stay based on visa over 90 days, as stipulated by Act No. 326/1999 Coll.) and foreigners with granted asylum status (in compliance with Act No. 325/1999 Coll.). Since 1<sup>st</sup> May 2004, in accordance with amendment No. 326/1999 Coll., the figures include citizens of the European Union with temporary stay on the territory of the Czech Republic, and citizens of other countries with long-term stay. The data contain also information on events (marriages, births and deaths) of permanent residents of CR that occurred abroad.
