

I. Basic methodological approaches

Since 2002 the **LFSS questionnaire** has been fully harmonised with Eurostat's survey and corresponds to Council Regulation (EC) No. 577/98. Nevertheless, the contents of Eurostat's survey are still developing and in this context the Czech Statistical Office (CZSO) makes appropriate adjustments to the national LFSS questionnaire. In spite of that, the contents and formal structure of the quarterly publication remain unchanged, which enables the reader good guidance with respect to the publications for previous quarters. Also kept are the continuity and consistence of statistical data in chronological order.

On 1 January 2000, a territorial administrative structure of the Czech Republic dividing the country into **14 Regions** ("higher territorial self-governing units"), became effective under the Constitutional Act No. 347/97 Sb. As a follow-up, to comply with the statistical and analytical needs and the needs of the European Union, eight statistical territorial units (**Areas**) were formed according to the Resolution of the Cabinet of the Czech Republic No. 707/1998. The territorial administrative structure of the Czech Republic, complying with the NUTS classification (La Nomenclature des Unités Territoriales Statistiques) used in EU countries, can be seen from the maps in the Technical Notes. This quarterly LFSS publication gives an insight into the labour market at all basic levels, i.e. NUTS 1 - Czech Republic, NUTS 2 - statistical Areas and NUTS 3 - Regions.

The LFSS **covers households living in randomly sampled dwellings**. Under reporting duty to the survey are all persons usually living in the dwelling, disregarding the type of their stay (permanent residence, temporary, long-term or not registered stay). For persons aged under 15 only basic data are asked for: relationship to head of the household, age, gender and nationality. Persons aged 15 and over are supposed to answer additional questions concerning their status in the labour market. The survey does not cover persons living in collective accommodation establishments for a long period of time, which is why data on certain population groups (especially foreign nationals living and working in the Czech Republic) are rather scarce. According to Eurostat, such data can be retrieved from administrative sources or obtained through a special survey taken outside the LFSS.

In Q2 2019, the sample included less than **24 thousand dwellings** in the Czech Republic (0.6% of all permanently occupied dwellings), in which more than **51 thousand respondents of all age groups** were surveyed, including almost **44 thousand respondents aged 15 and over**. This sample size allows making estimates of labour market indicators for the country and also estimates for regions and areas with reliability required by Eurostat.

Number of households and persons aged 15 and over in the sample

Czech Republic	Regions													
	Hl. m. Praha	Středočeský	Jihočeský	Plzeňský	Karlovarský	Ústecký	Liberecký	Královéhradecký	Pardubický	Vysočina	Jihomoravský	Olomoucký	Zlínský	Moravskoslezský
Number of households in the sample														
23733	2037	2991	1810	1600	1065	1386	1153	1323	1332	1347	2483	1326	1300	2580
Number of persons aged 15 and over in the sample														
43819	3209	5503	3327	3127	1879	2395	2073	2476	2518	2699	4962	2382	2568	4701

Weight adjustments have been made to **all the sample data** according to the age structure of the population based on mid-quarter population projection for the Labour Force Sample Survey. The above method of adjustments reflects best the group of permanent residents in the survey.

The LFSS is a continuous survey whose results are assessed and published on a quarterly basis. The results are released three months after end of the reference quarter. In connection with the unification of the national questionnaire and the list of questions obligatory for EU member states, the contents of this publication are being modified. **Since January 2013**, basic employment rate, unemployment rate and economic activity rate, seasonally adjusted, are also published on a monthly basis in the News Releases on the pages of the Czech Statistical Office – www.czso.cz:

<https://www.czso.cz/csu/czso/employment-unemployment>

From Q1 2011 are not separately published data **for the civilian sector**. All previously published tables for the civilian sector (table-type 300) are published for the whole national economy, in the same format, while retaining headers and columns.

From 2011, some indicators are surveyed on a limited extent and therefore the data are not part of regular quarterly and annual publications. Relevant data will be published **just as the annual data** and can be requested through the Information Service of the Czech Statistical Office. These earlier regularly published variables are (in the previous quarters tables No.):

- Reasons for economic inactivity (107)
 - Persons with disabilities (108, 314)
 - The respondent's situation a year ago (109)
 - The reason for part-time work (311)
 - Work in atypical time – in shifts, evening, night, Saturday, Sunday (313)
- Since 2014, the fields of education again collected quarterly** (classification ISCED 97).
- Fields of education (103, 105, 203, 403) - Note: Data is possible provide on request.

(From mid-2016 in the fields of education are determined by the new classification of fields of education CZ-ISCED-F 2013 in LFS, which is fully in line with the international standard, which was created by UNESCO).
