Introduction

Contents of the publication

Basic methodological approaches

Explanatory notes on methodology

- Links to international standard
- Methodology of LFSS indicators
- Activity status
- Employment
- Unemployment
- Relative indicators
- Other special indicators

Notes on time series

- Estimates of confidence intervals
- Use of annex tables
- Sources and classifications used
- Characteristics of classifications
- Development of methodology of the indicators and characteristics of their changes
- List of tables
- Technical notes
- Availability of the publication

Tables

Grouping I. Population of the Czech Republic

101	R (K)	Population by age and highest educational attainment
102	R (K)	Activity status of population by age
103	R	Labour force by areas and regions
104	Q	Labour force by areas and regions

Grouping II. Employed persons in national economy

201	(R)	Employed persons by areas and regions
202	Q	Employed persons by areas and regions
203	R (K)	Employed persons by age and highest educational attainment
204	R (K)	Employed persons by industry
205	R (K)	Employed persons by occupation and professional status
206	R	Second job by areas and regions
207	Q	Second job by areas and regions
208	R	Second job by professional status and industry

Grouping III. Unemployed persons

301	R	Unemployed persons by areas and regions
302	Q	Unemployed persons by areas and regions
303	R (K)	Unemployed persons by age and highest educational attainment
304	R (K)	Duration and ways of seeking a job

Grouping IV. Rates

401	R	Unemployment rate by areas and regions
402	Q	Unemployment rate by areas and regions
403	R (K)	Unemployment rate by age and highest educational attainment
404	R	Participation rate by areas and regions
405	Q	Participation rate by areas and regions
406	R (K)	Participation rate by age and highest educational attainment

Annex

Estimates of 95% confidence interval of the basic estimates for population aged 15+ :

I-1a	For quarterly estimates in total
I-1b	For quarterly estimates for men and women
I-2a	For annual estimates in total
I-2b	For annual estimates for men and women

Estimates of 95% confidence interval of the partial estimates for population aged 15+ at the national level:

II-1a	For annual estimates in total
II-1b	For annual estimates for men and women
III	Relative sizes of samples in Regions, Areas and the Czech Republic in all years and quarters
