

## Methodological notes

The designation of the municipality as the town, has undergone a long-term historical development. It was designated by the elevation of the municipality to town and later by laws with the list of towns or newly designated towns. The development of the determination of municipalities as towns is discussed in more detail in the publication of the Czech Statistical Office Historical lexicon of municipalities of the Czechia 1869–2011 (<https://www.czso.cz/csu/czso/historicky-lexikon-obci-1869-az-2015>).

As of 1 January 2023, there were 609 towns in the Czechia.

The publication contains data on the population and population change of the individual towns in the ten-year time series 2013–2022 with all data referring to the territory of a given town valid as at 1 January of a given year. Besides natural change and net migration, changes in population size of towns thus can also result from joining or separating of municipalities or their parts. The following territorial administrative changes occurred in the period covered by this publication:

**The territorial administrative changes of towns concerned:**

Town	Change of territory (Population positive = merging of municipality or its part Population negative = separating of municipality of its part)		
	Year (1 January)	Population	Municipality
Bruntál	2020	-92	Nové Heřminovy
Jičín	2020	68	Tuř
Ledeč nad Sázavou	2016	-84	Kozlov
