^{*)} Výpočet ukazatelů ve stálých cenách roku 2000 byl proveden metodou řetězení meziročních indexů (vypočtených vždy na bázi průměru předchozího roku). Jde o metodu doporučenou Eurostatem. Tato metoda zajišťuje vazbu ukazatelů ve čtvrtletní a roční periodicitě, ale neumožňuje vazbu jednotlivých komponent na úhrn.

^{*)} The calculation of the indicators at constant prices of 2000 was made by chaining year-on-year indices (always based on the previous year's average). This method is recommended by Eurostat and establishes links between quarterly and annual indicators. It does not permit to make links between individual components and the total, though.
