

The chart displays the development of spruce wood volume (Kč/m³) from 2005 to 2025, categorized by quality class (tř. jak.). The Y-axis represents the volume in Kč/m³, ranging from 0 to 4500. The X-axis represents the time in quarters (čtvrtletí), from 1.2.2005 to 1.2.2025.

The legend identifies six data series:

- smrk I. tř. jak. (Purple bars)
- smrk II. tř. jak. (Green bars)
- smrk III.A/B tř. jak.2) (Red line)
- smrk III.C tř. jak.2) (Blue line)
- smrk III.D tř. jak.2) (Teal line)
- smrk V. tř. jak.2) (Orange line)

The chart shows a general upward trend in volume over time, with a significant peak in 2022. The volume is highest for the first quality class (smrk I. tř. jak.) and lowest for the fifth quality class (smrk V. tř. jak.2).

Čtvrtletní data za smrk I. a II. třídy jakosti publikována pouze do roku 2019.
