1st - 3rd quarter	2 364 724	107.7	2 061 748	106.2	101.4	114.7

¹⁾ The calculation of the indicators at constant prices of 2000 was made by chaining year-on-year indices (always based on the previous year's average). This method is recommended by Eurostat and establishes links between quarterly and annual indicators. It does not permit to make links between individual components and the total, though.

 $^{^{\}rm 2)}$ CPPY - Corresponding period of previous year
