^{*)} Výpočet ukazatelů ve stálých cenách roku 2010 byl proveden metodou řetězení meziročních indexů (vypočtených vždy na bázi průměru předchozího roku).

Tato metoda zajišťuje vazbu ukazatelů ve čtvrtletní a roční periodicitě, ale neumožňuje vazbu jednotlivých komponent na úhrn.

^{*)} The calculation of the indicators at constant prices of 2010 was made by chaining year-on-year indices (always based on the previous year's average).

This method establishes links between quarterly and annual indicators. However, it does not enable to make links between individual components and the total.
