

Methodological notes

The designation of the municipality as the town, has undergone a long-term historical development. It was designated by the elevation of the municipality to town and later by laws with the list of towns or newly designated towns.

As of 1 January 2025, there were 610 towns in the Czechia.

The publication contains data on the population and population change of the individual towns in the ten-year time series 2015–2024 with all data referring to the territory of a given town valid as at 1 January of a given year. Besides natural change and net migration, changes in population size of towns thus can also result from joining or separating of municipalities or their parts. The following territorial administrative changes occurred in the period covered by this publication:

The territorial administrative changes of towns concerned:

Town	Change of territory (Population positive = merging of municipality or its part Population negative = separating of municipality of its part)		
	Year (1 January)	Population	Municipality
Bruntál	2020	-92	Nové Heřminovy
Jičín	2020	68	Tuř
Ledeč nad Sázavou	2016	-84	Kozlov
Rožmitál pod Třemšínem	2021	-43	Nepomuk
Vyškov	2017	-5	Prusy-Boškůvky

All data refer to citizens of Czechia and foreigners with permanent residence in Czechia, third-country nationals with temporary residence in the territory of Czechia based on a long-term visa (over 90 days), nationals of the EU Member States, Norway, Switzerland, Iceland, Liechtenstein and their family members with notified temporary residence in the territory of Czechia and foreigners granted international protection in Czechia. Since 2022, persons granted temporary protection in Czechia with usual residence in Czechia have also been included in the population.

For more detailed information see <https://csu.gov.cz/population-methodology>.

For definitions of demographic events and the most commonly, used demographic indicators see <https://csu.gov.cz/population-change-methodology>.

Age means completed age (in years).

Marriages are territorially classified according to the groom's place of residence (unless otherwise stated).

Divorces are territorially classified according to the last common residence of the married couple.

The births are territorially classified according to the mother's place of residence at the time of birth.

Abortions are territorially classified according to the woman's place of residence at the time of the abortion. The time series ends in 2023, as from 2024, abortions are no longer included in the demographic statistics processed by the Czech Statistical Office.

Data for migration are given in total, i.e. in aggregate of internal (between municipalities) and international migration.
