¹ Employment in national concept: residents working in residents and non-residents production units.

² Employment in domestic concept: residents and non-residents working in residents production units.

³ Numbers of non-residents working in the CR come from the model "balance of number of foreigners", which balance number of foreigners from different data sources. They use data from Ministry of the Interior of the CR, Ministry of Industry and Trade of the CR, Ministry of Labour and Social Affairs of the CR, Ministry of Foreign Affairs of the CR and other data.

⁴ Basic source of data on number of residents working abroad is the Labour Force Sample Survey executed by CZSO. According to international methodology into working residents of the CR are included also the residents, who stay in the Czech Republic territory, but work for a foreign embassy and EU institutions.
